## APPLICATION RATES

### SOIL APPLICATION RATES

**Drip Systems and Drip Tape** — 1 - 4 quarts (1 - 4 liters) per acre, application depending on the crop and its growth stage. If a pre plant fertilizer is used, a total of 2 - 5 gallons (8 - 19 liters) **GOLD LABEL NITRO-POTASSIO** is recommended. If a pre plant fertilizer is not used a total of 5 -10 gallons (19 - 38 liters) per acre throughout the growing season is recommended.

1. If soil and petiole tests show a deficiency in micronutrients, **WESTERN NUTRIENTS START-UP** line should be added to **GOLD LABEL NITRO-POTASSIO**. **START-UP** chelated micronutrients should be added at the rate of ½ pint per gallon (¼ liter per 4 liters) of **GOLD LABEL NITRO-POTASSIO**. If a number of micronutrients are deficient do not exceed 1 pint ( ½ liter) Start-Up products per gallon (4 liters) of **GOLD LABEL NITRO-POTASSIO**. For best results to obtain additional micronutrient boost use **WESTERN NUTRIENTS' NUTRAPLEX** or **MICRO PLUS FOLIAR LINES** of products.

**Sprinkler systems — Flood Irrigation** — These systems are not as effective for fertilizer application as drip systems. For best results, follow drip recommendations. A pre plant or side dress application often is required for this type of irrigation system.

### Foliar Application — Air or Ground Rig

Tree Crop	- 1 quart (1 liter) per acre
Vegetable Crops	- 1 pint ( ½ liter) per acre
Field Crops	- 1 pint ( ½ liter) per acre

**DILUTION RATES** — Use a minimum of 10 gallons (38 liters) of water per acre.
